Notes:

- 1. All dimensions are in millimeters.
 - 2. Tolerance is $\pm 0.20\text{mm}$ unless otherwise noted.
 - 3. Protruded resin under flange is 1.0mm max
 - 4. Lead spacing is measured where the leads emerge from the package.
 - 5. Caution in ESD: Static Electricity and surge damages the LED. It is recommend to use a wrist band or anti-electrostatic glove when handling the LED.
- All devices, equipment and machinery must be properly grounded.

Explanation:

№2 figure: Different current has different percent of brightness. 1.0 is nominal - 20mA.

№3 figure: When LED in non-operating state, the luminous intensity changes due to the ambient temperature.

№5 figure: The higher ambient temperature, the lower operating current.

Packing Specification

Dimensions are specified as follows: mm

Normal packing quantity: 2 000 pcs/reel

Suggested Way of Usage:

The using of the LED are limited by current.

Recommended forward current is 20mA, the lifespan more 2 years.

The maximum forward current is 50mA. More than 20mA, lifespan will be reduced.
